The Recent Performance of the Italian Economy Apr 10 2021

Monthly Bulletin of the Bureau of Economic and Social Intelligence May 31 2020

The Dissemination of Economic Ideas Mar 09 2021 This highly illuminating book marks a significant stage in our growing understanding of how the development of national traditions of economic thought has been affected by both internal and external factors. The expert contributors set an explicit agenda for the study of the dissemination of economic ideas across four centuries, acknowledging that the history of dissemination is also a history of the flux of economic beliefs, rendering any generalisation difficult, if not impossible. Topics explored include systems of political economy, European and American interactions, the diffusion of economic ideas in South-Eastern Europe and beyond, and the exchange of ideas between Japan and the rest of the world. This book will prove a fascinating and stimulating read for scholars and researchers in the field of economics generally, and more specifically in heterodox economics, the history of economic thought and economic theory.

Tax Systems and Tax Reforms in Europe Sep 03 2020 The last decade has seen important changes taking place in the tax regimes of many European countries. A comprehensive picture of what is happening in European fiscal systems has not been easy to find - until now. This impressive book featuring contributions from leading scholars, will be of great interest not only to academics but also to those involved in the financial sectors across the world.

Miscellanea Taparelli Sep 15 2021 Il 21 settembre 1962 si compiono cento anni dalla morte del P. Luigi Taparelli d'Azeglio della Compagnia di Gesù. Ricopriva allora la carica di Superiore e Direttore della Civiltà Cattolica, il periodico dei gesuiti italiani al quale aveva dedicato gli ultimi dodici anni della sua vita, dopo averlo tenuto a battesimo nel 1850. Chiudeva gli occhi nel Collegio romano, centro di studi fondato da S. Ignazio di Loyola ed illustrato in tre secoli da uomini insigni nelle scienze sacre ed umane e del quale egli stesso era stato il primo Rettore, quando Leone XII, nel 1824, lo aveva restituito alla Compagnia di Gesù. Questa coincidenza di luogo era l'espressione di una continuità spirituale e di pensiero unificatore che aveva caratterizzato tutta la sua vita. Rettore del Collegio romano, P. Taparelli non era stato soltanto coscienzioso dirigente di un Istituto che raccoglieva per gli studi umanistici il fiore della gioventù romana, e per le scienze sacre gli alunni dei Seminari di tutto il mondo, ma soprattutto un pioniere e capo di un movimento che doveva imprimere un indirizzo al pensiero cattolico. Eredi e partecipi delle ricchezze intellettuali e morali di questa figura di uomo di scienza e di fede, la Pontificia Università Gregoriana e la Civiltà Cattolica hanno voluto commemorare degnamente il compiersi dei cento anni dalla sua morte.

Production, Distribution and Trade Oct 24 2019 This collection brings together significant new contributions to the Sraffa--based theories of production and distribution, from post-Keynesian arguments concerning monetary and macro economics to the history of thought and methodology. All of the authors are well established authorities in their field, and in this book they add stimulating and original pieces of analysis to the contemporary literature. Production, Distribution and Trade is divided into three parts. The first explores analytical issues in production and exchange theory, the second examines Postkeynesian Macroeconomics and the final part includes essays on the history of economic thought and methodology. This collection has been written in honour of Sergio Parrinello and is a fitting tribute to his untiring efforts to stimulate discussion among Classicists, Marxists, Postkeynesians, and Evolutionists. The book is a clear and convincing attempt to prove that an alternative paradigm to mainstream economics is alive and thriving and to argue that these perspectives shed better light on current economic problems, both as diagnosis and in terms of policy conclusions. The book will be of interest to Economics postgraduate students and researchers working in the Classical and Postkeynesian tradition.

Palgrave's Dictionary of Political Economy Dec 18 2021

The Literature of Political Economy Feb 20 2022 Featuring many crisply annotated entries, this 1845 bibliography ranges in coverage from money and prices to slavery and foundling hospitals.

Malthus Across Nations Sep 22 2019 The writings of Thomas Robert Malthus continue to resonate today, particularly *An Essay on the Principle of Population* which was published more than two centuries ago. Malthus Across Nations creates a fascinating picture of the circulation of his economic and demographic ideas across different countries, highlighting the reception of his works in a variety of nations and cultures. This unique book offers not only a fascinating piece of comparative analysis in the history of economic thought but also places some of today's most pressing debates into an accurate historical perspective, thereby improving our understanding of them.

Business Cycles in Economic Thought Mar 29 2020 *Business Cycles in Economic Thought* underlines how, over the time span of two centuries, economic thought interacted with cycles in a continuous renewal of theories and rethinking of policies, whilst economic actions embedded themselves into past economic thought. This book argues that studying crises and periods of growth in different European countries will help to understand how different national, political and cultural traditions influenced the complex interaction of economic cycles and economic theorizing. The editors of this great volume bring together expert contributors consisting of economists, historians of economic thought and historians of economics, to analyse crises and theories of the nineteenth and the twentieth century. This is alongside a comprehensive outlook on the most relevant advances of economic theory in France, Germany and Italy, as well as coverage of non-European countries, such as the United States. Several of the highly prestigious Villa Vigoni Trilateral Conferences formed the background for the discussions in this book. This volume is of great interest to students and academics who study history of economic thought, political economy and macroeconomics.

The Paretian School and Italian Fiscal Sociology Jul 25 2022 In the 1930s, a Pareto vogue emerged in the English-speaking world. In Italy, however, the Paretian episode was already well established, with many Italian economists investigating the relationship between economics and sociology based on Pareto's contributions. This is a study of the Paretian school and its 'fiscal sociology'.

The History and Tradition of Accounting in Italy Jun 24 2022 Italian accounting has a long and honourable tradition of theoretical and applied analysis of the accounting and reporting function, perceived and defined much more broadly than in the Anglo-Saxon tradition. The high point of this perhaps, is the creation of what is known as *Economia Aziendale* (EA). The antecedents, genesis and later developments are presented here in detail by highly knowledgeable specialists in the field. EA takes as a prerequisite the necessity of the business (entity/azienda) to ensure its own long-run survival. This requires that the necessary resources are retained and preserved, so operating capital maintenance, by definition future-oriented, is essential. It requires a focus on the particular business organization, entity-specific and consistent with today's notion of the business model. Entity-specific information relevant to current and future cash flows is a necessary pre-requisite for ensuring long-run survival, which historical cost accounting, or fair value (being market-specific not entity-specific) satisfactorily achieve. Flexibility of valuation and of reporting, always relevant to the specific asset at the specific time in the specific place, is a necessary condition for effective management. This is exactly the focus of EA and its analysis and tradition. Scholars and advanced students of international regulation and accounting, as well as accounting history, will find this an invaluable guide to a vibrant, scholarly tradition of great practical relevance today.

Computational Science and Its Applications -- ICCSA 2012 Aug 14 2021 The four-volume set LNCS 7333-7336 constitutes the refereed proceedings of the 12th International Conference on Computational Science and Its Applications, ICCSA 2012, held in Salvador de Bahia, Brazil, in June 2012. The four volumes contain papers presented in the following workshops: 7333 - advances in high performance algorithms and applications (AHPAA); bioinspired computing and applications (BIOCA); computational geometry and applications (CGA); chemistry and materials sciences and technologies (CMST); cities, technologies and planning (CTP); 7334 - econometrics and multidimensional evaluation in the urban environment (EMEUE); geographical analysis, urban modeling, spatial

statistics (Geo-An-Mod); 7335 - optimization techniques and applications (OTA); mobile communications (MC); mobile-computing, sensing and actuation for cyber physical systems (MSA4CPS); remote sensing (RS); 7336 - software engineering processes and applications (SEPA); software quality (SQ); security and privacy in computational sciences (SPCS); soft computing and data engineering (SCDE). The topics of the fully refereed papers are structured according to the four major conference themes: 7333 - computational methods, algorithms and scientific application; 7334 - geometric modelling, graphics and visualization; 7335 - information systems and technologies; 7336 - high performance computing and networks.

Handbook on the Economic Complexity of Technological Change Nov 05 2020 This comprehensive and innovative Handbook applies the tools of the economics of complexity to analyse the causes and effects of technological and structural change. It grafts the intuitions of the economics of complexity into the tradition of analysis based upon the Schumpeterian and Marshallian legacies. The Handbook elaborates the notion of innovation as an emerging property of the organized complexity of an economic system, and provides the basic tools to understand the recursive dynamics between the emergence of innovation and the unfolding of organized complexity. In so doing, it highlights the role of organizational thinking in explaining the introduction of innovations and the dynamics of structural change. With a new methodological approach to the economics of technological change, this wide-ranging volume will become the standard reference for postgraduates, academics and practitioners in the fields of evolutionary economics, complexity economics and the economics of innovation.

Money and Markets Aug 02 2020 This book brings together fourteen essays by leading authors in the field of economics to explore the relationship between money and markets throughout economic theory and history, providing readers with the key to understanding fundamental issues in monetary theory and other important debates in contemporary economics. Addressing this popular and topical area in economic discussion and debate an impressive array of contributors, including Meghnad Desai, Charles Goodhart and John Davis examine the theory, policy and history of economics in the USA, Europe and Japan. The subjects covered include: the history of economic thought money and banking monetary economics poverty modern economic history. This volume is essential reading for postdoctoral researchers and historians of economic thought across the globe.
