There is No Such Thing as a Free Press May 27 2022 The aim of this book is to launch a polemic for the freedom of the press against all of the attempts to police, defile and sanitise journalism today. Once the media reported the news. Now it makes it. From the phone-hacking scandal to rows about press regulation, super-injunctions, leaks, libel and privacy laws, the power of the Murdoch empire, and the future of the BBC, the media has become the story. The British press is in crisis and under scrutiny as never before. In the fall-out from the phone-

hacking scandal one national newspaper has already been closed down and some would like to see others go the same way. However, this book argues that there is not too much media freedom in Britain today, but too little. There are not too few controls and restrictions on what can legitimately be published and broadcast, but too many - both formal and informal. Some newspapers in Britain and elsewhere might be going 'free' in financial terms, under pressure from declining sales and the new online media. But in almost every way that matters, the press is less free - thanks both to external constraints and the internal corrosion of the foundations of good journalism. This book aims to shake up the one-way 'debate' about the freedom of the media. It will argue that the media's standing has been undermined both from without and within, and put the case for standing up both to the censors and to the conformists in all their guises.

Teaching Computational Thinking Apr 13

2021 A guide for educators to incorporate computational thinking—a set of cognitive skills applied to problem solving—into a broad range of subjects. Computational thinking—a set of mental and cognitive tools applied to problem solving—is a fundamental skill that all of us (and not just computer scientists) draw on. Educators have found that computational thinking enhances learning across a range of subjects and reinforces students’ abilities in reading, writing, and arithmetic. This book offers a guide for incorporating computational thinking into middle school and high school classrooms, presenting a series of activities, projects, and tasks that employ a range of pedagogical practices and cross a variety of content areas. As students problem solve, communicate, persevere, work as a team, and learn from mistakes, they develop a concrete understanding of the abstract principles used in computer science to create code and other digital artifacts. The book guides students and teachers to

integrate computer programming with visual art and geometry, generating abstract expressionist-style images; construct topological graphs that represent the relationships between characters in such literary works as Harry Potter and the Sorcerer’s Stone and Romeo and Juliet; apply Newtonian physics to the creation of computer games; and locate, analyze, and present empirical data relevant to social and political issues. Finally, the book lists a variety of classroom resources, including the programming languages Scratch (free to all) and CodeSters (free to teachers). An accompanying website contains the executable programs used in the book’s activities.

The Uncensored War Oct 27 2019 Vietnam was America's most divisive and unsuccessful foreign war. It was also the first to be televised and the first of the modern era fought without military censorship. From the earliest days of the Kennedy-Johnson escalation right up to the American withdrawal, and even today, the

media's role in Vietnam has continued to be intensely controversial. The "Uncensored War" gives a richly detailed account of what Americans read and watched about Vietnam. Hallin draws on the complete body of the New York Times coverage from 1961 to 1965, a sample of hundreds of television reports from 1965-73, including television coverage filmed by the Defense Department in the early years of the war, and interviews with many of the journalists who reported it, to give a powerful critique of the conventional wisdom, both conservative and liberal, about the media and Vietnam. Far from being a consistent adversary of government policy in Vietnam, Hallin shows, the media were closely tied to official perspectives throughout the war, though divisions in the government itself and contradictions in its public relations policies caused every administration, at certain times, to lose its ability to "manage" the news effectively. As for television, it neither showed the "literal horror of war," nor did it play a

leading role in the collapse of support: it presented a highly idealized picture of the war in the early years, and shifted toward a more critical view only after public unhappiness and elite divisions over the war were well advanced.

The Elements of Journalism Sep 30 2022 The authors outline the main principles of journalism, discussing the ethical and professional issues affecting the work of newspeople, the forces shaping the profession, and the future of journalism. Reprint. 25,000 first printing.

Mass Media Oct 20 2021 Mass media has become an integral part of the human experience. News travels around the world in a split second affecting people in other countries in untold ways. Although being on top of the news may be good, at least for news junkies, mass media also transmits values or the lack thereof, condenses complex events and thoughts to simplified sound bites and often ignores the essence of an event or story. The selective

bibliography gathers the books and magazine literature over the previous ten years while providing access through author, title and subject indexes.

What are Journalists For? Jul 29 2022 He traces the intellectual roots of the movement and shows how journalism can be made vital again by rethinking exactly what journalists are for."--Jacket.

Authorship's Wake Jun 03 2020 Authorship's Wake examines the aftermath of the 1960s critique of the author, epitomized by Roland Barthes's essay, "The Death of the Author." This critique has given rise to a body of writing that confounds generic distinctions separating the literary and the theoretical. Its archive consists of texts by writers who either directly participated in this critique, as Barthes did, or whose intellectual formation took place in its immediate aftermath. These writers include some who are known primarily as theorists (Judith Butler), others known primarily as

novelists (Zadie Smith, David Foster Wallace), and yet others whose texts are difficult to categorize (the autofiction of Chris Kraus, Sheila Heti, and Ben Lerner; the autotheory of Maggie Nelson). These writers share not only a central motivating question — how to move beyond the critique of the author-subject — but also a way of answering it: by writing texts that merge theoretical concerns with literary discourse.

Authorship's Wake traces the responses their work offers in relation to four themes: communication, intention, agency, and labor.

Yellow Journalism Jan 11 2021 This offers a detailed and long-awaited reassessment of one of the most maligned periods in American journalism—the era of the yellow press. The study challenges and dismantles several prominent myths about the genre, finding that the yellow press did not foment—could not have fomented—the Spanish-American War in 1898, contrary to the arguments of many media historians. The study presents extensive evidence showing that

the famous exchange of telegrams between the artist Frederic Remington and newspaper publisher William Randolph Hearst-in which Hearst is said to have vowed to "furnish the war" with Spain-almost certainly never took place. The study also presents the results of a systematic content analysis of seven leading U. S. newspapers at 10 year intervals throughout the 20th century and finds that some distinguishing features of the yellow press live on in American journalism.

Worlds of Journalism Aug 18 2021 How do journalists around the world view their roles and responsibilities in society? Based on a landmark study that has collected data from more than 27,500 journalists in 67 countries, *Worlds of Journalism* offers a groundbreaking analysis of the different ways journalists perceive their duties, their relationship to society and government, and the nature and meaning of their work. Challenging assumptions of a universal definition or concept of journalism, the

book maps a world populated by a rich diversity of journalistic cultures. Organized around a series of key questions on topics such as editorial autonomy, journalistic ethics, trust in social institutions, and changes in the profession, it details how the practice of journalism differs across the world in a range of political, social, and economic contexts. The book covers how journalism as an institution is created and re-created by journalists and how they experience their profession in very different ways, even as they retain a commitment to some basic, widely shared professional norms and practices. It concludes with a global classification of journalistic cultures that reflects the breadth of worldviews and orientations found in disparate countries and regions. *Worlds of Journalism* offers an ambitious, comparative global understanding of the state of journalism in a time when it is confronting a series of economic and political threats.

Strangers in Their Own Land Jul 05 2020 The

National Book Award Finalist and New York Times bestseller that became a guide and balm for a country struggling to understand the election of Donald Trump "A generous but disconcerting look at the Tea Party. . . . This is a smart, respectful and compelling book." —Jason DeParle, The New York Times Book Review

When Donald Trump won the 2016 presidential election, a bewildered nation turned to *Strangers in Their Own Land* to understand what Trump voters were thinking when they cast their ballots. Arlie Hochschild, one of the most influential sociologists of her generation, had spent the preceding five years immersed in the community around Lake Charles, Louisiana, a Tea Party stronghold. As Jedediah Purdy put it in the *New Republic*, "Hochschild is fascinated by how people make sense of their lives. . . . [Her] attentive, detailed portraits . . . reveal a gulf between Hochschild's 'strangers in their own land' and a new elite." Already a favorite common read book in communities and on

campuses across the country and called "humble and important" by David Brooks and "masterly" by Atul Gawande, Hochschild's book has been lauded by Noam Chomsky, New Orleans mayor Mitch Landrieu, and countless others. The paperback edition features a new afterword by the author reflecting on the election of Donald Trump and the other events that have unfolded both in Louisiana and around the country since the hardcover edition was published, and also includes a readers' group guide at the back of the book.

Negotiation and Statecraft: Ninety-fourth Congress, first session, pursuant to section 4, Senate Resolution 49, 94th Congress, with panel on the international freedom to write and publish, November 18, 1975 Apr 01 2020

How the World Changed Social Media Sep 18 2021 *How the World Changed Social Media* is the first book in *Why We Post*, a book series that investigates the findings of anthropologists who

each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

The Printing Press as an Agent of Change Dec

02 2022 A full-scale historical treatment of the advent of printing and its importance as an agent of change, first published in 1980.

Grub Street Abroad Sep 06 2020 Eighteenth-century French readers who wanted to keep up with political and literary trends had to rely on books and journals imported from abroad. French writers, such as Voltaire and Rousseau, also depended on foreign firms to get their works in print. *Grub Street Abroad* demonstrates the importance of extraterritorial publishing for the Enlightenment and the French Revolution. By placing the periphery at the centre of the stage, it highlights neglected cosmopolitan aspects of the French Enlightenment and points to forces which undercut Bourbon claims of cultural hegemony. Firms serving French markets from abroad are viewed as part of a far-flung communications network which, although sensitive to diplomatic pressures from diverse courts, still comprised a relatively autonomous, independent field of operations. Topics covered

include the publishing and editing of francophone journals and clandestine manuscripts; the emergence of the book review and the editorial board; the reliance of the philosophes upon foreign firms; the cosmopolitan outlook of so-called 'Grub Street hacks'. Overall, a revised picture of the nature and importance of publishing in the period emerges - a presentation that will provoke and interest a wide range of historical, literary, and bibliographical specialists.

Exporting Press Freedom Aug 30 2022

International media assistance is a small but important form of international democracy-promotion aid. Media assistance boomed after the 1989 transitions in Central Europe, but now flows to virtually all regions of the world. Today the media assistance industry is focused on the problem of sustainability: How are free and independent public affairs media supposed to maintain their editorial mission while facing hostile political systems or the demands of the

consumer marketplace? Many media in developing countries have been or are grant-dependent. When grants are exhausted or withdrawn, media that were funded to further democratic consolidation typically wither and die. Some become mere grant chasers. Others abandon public service to the demands of market competition, or political patronage. As a result, governmental and non-governmental grant makers now emphasize the need for sustainability in considering grants in the media sector. Many grant recipients have grown frustrated, sometimes bitter, and have sought to take a much more active role in the way assistance programs are put together. Just how is sustainability to be achieved while also ensuring a public-service editorial mission? "Exporting Press Freedom" examines the history and practice of media assistance, and argues that the dilemma of media independence and sustainability is best understood as an economic problem rather than one of poor editorial

standards or lack of will. It includes profiles of news and public affairs media in developing and democratizing countries, and also of two non-governmental organizations that have pioneered the use of low-interest loans in media assistance. These profiles exemplify strategic and entrepreneurial approaches to developing and supporting public service media. Such approaches may be of use not only in the developing world, but in the consolidated Western democracies as well, where concern has grown about poor journalistic performance and its consequences for democratic governance. "Craig L. LaMay" is a journalist, an assistant professor at Northwestern University's Medill School of Journalism, an adjunct professor at Northwestern's School of Law, and a faculty associate at Northwestern's Institute for Policy Research.

Press Freedom as an International Human Right Jan 03 2023 This book examines why press freedom has not become part of the

established international human rights debate, despite its centrality to democratic theory. It argues that an unrestricted press is not just an important economic actor, but also an influential power in the political process, a status that interferes with government interests of sustaining their own power and influence.

Despite the popularity of ideational explanations in the field of human rights studies, in the case of promoting press freedom, considerations of power and strategic interests rather than ideas dominate state behavior. The author makes the case that the current place of press freedom in the human rights debate needs to be rethought not only in developing countries, but in liberal democracies as well.

How Media Inform Democracy Aug 25 2019 In this timely book, leading researchers consider how media inform democracy in six countries - the United States, the United Kingdom, Belgium, the Netherlands, Norway, and Sweden. Taking as their starting point the idea that citizens need

to be briefed adequately with a full and intelligent coverage of public affairs so that they can make responsible, informed choices rather than act out of ignorance and misinformation, contributors use a comparative approach to examine the way in which the shifting media landscape is affecting and informing the democratic process across the globe. In particular, they ask: Can a comparative approach provide us with new answers to the question of how media inform democracy? Has increased commercialization made media systems more similar and affected equally the character of news and public knowledge throughout the USA and Europe? Is soft news and misinformation predominantly related to an American exceptionalism, based on the market domination of its media and marginalized public broadcaster? This study combines a content analysis of press and television news with representative surveys in six nations. It makes an indispensable contribution to debates about

media and democracy, and about changes in media systems. It is especially useful for media theory, comparative media, and political communication courses.

The Battle of the Press as Told in the Story of the Life of Richard Carlile by His Daughter, Theophila Carlile Campbell Apr 25 2022

Media and Climate Change Jun 15 2021 This book looks at the media's coverage of climate change and investigates its role in representing the complex realities of climate uncertainties and its effects on communities and the environment. The book explores the socio-economic and cultural understanding of climate issues, the influence of environment communication via the news and the public response to it. It also examines the position of the media as facilitator between scientists, policy makers and the public. Drawing extensively from case studies, personal interviews, comparative analysis of international

climate coverage, and a close reading of newspaper reports and archives, the author studies the pattern and frequency of climate coverage in the Indian media and their outcomes. With a special focus on the Western Ghats, the book also discusses political rhetoric, policy parameters and events which trigger a debate about development over biodiversity crisis and environmental risks in India. This book will be of great interest to scholars and researchers of environmental studies, especially climate change, media studies, public policy and South Asian studies as well as a conscientious citizen who deeply cares for the environment.

Community in the Digital Age Oct 08 2020 Is the Internet the key to a reinvigorated public life? Or will it fragment society by enabling citizens to associate only with like-minded others? Online community has provided social

researchers with insights into our evolving social life. As suburbanization and the breakdown of the extended family and neighborhood isolate individuals more and more, the Internet appears as a possible source for reconnection. Are virtual communities 'real' enough to support the kind of personal commitment and growth we associate with community life, or are they fragile and ultimately unsatisfying substitutes for human interaction? *Community in the Digital Age* features the latest, most challenging work in an important and fast-changing field, providing a forum for some of the leading North American social scientists and philosophers concerned with the social and political implications of this new technology. Their provocative arguments touch on all sides of the debate surrounding the Internet, community, and democracy.

The Press as Public Educator Nov 01 2022 Looking at media, education and the environment, this book argues that it is essential to examine their connections and the adequacy

of these relationships for the future. The focus is on the educational function of the press and the problem that forms a context for this focus is the environment

Association for Behavioral and Cognitive Therapies (ABCT) Self-Help Book of Merit **Golden Gulag** May 03 2020 Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called "the biggest prison building project in the history of the world." Golden Gulag provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local,

conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the "three strikes" law—pose profound and troubling questions for the future of California, the United States, and the world. *Golden Gulag* provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

From Theory to Practice Mar 25 2022 From Theory to Practice is the first scholarly look at the possibilities and challenges of impartial and objective journalism in our digitized media world. This volume brings together contributions from editors at premiere news outlets like Reuters and the BBC to discuss how to assess, measure and apply impartiality in news and current affairs in a world where the impact of digital technologies is constantly changing how news is covered, presented and received. In this changing media environment, impartial journalism is as crucial as it ever was in traditional media, and this book offers an essential analysis of how to navigate a media milieu in which technology has sharply reduced the gatekeeping role news gatherers and producers used to have in controlling content

flow to audiences.

Enhancing Relationships with the Student Press Jul 17 2021

Lincoln and the Power of the Press Nov 20 2021 Examines Abraham Lincoln's relationship with the press, arguing that he used such intimidation and manipulation techniques as closing down dissenting newspapers, pampering favoring newspaper men, and physically moving official telegraph lines.

The Press and America May 15 2021 Textbook on mass media.

F. D. R. and the Press Feb 21 2022 Franklin D. Roosevelt's tempestuous, adversary relationship with the American press is celebrated in the literature of his administrations. Historians have documented the skill and virtuosity that he displayed in his handling and exploitation of the press. Graham J. White discovers the well of Roosevelt's excessive ardor: an intractable

political philosophy that pitted him against a fierce (though imaginary) enemy, the written press. White challenges and disproves Roosevelt's contention that the press was unusually severe and slanted in its treatment of the Roosevelt years. His original work traces FDR's hostile assessment of the press to his own political philosophy: an ideology that ordained him a champion of the people, whose task it was to preserve American democracy against the recurring attempt by Hamiltonian minorities (newspaper publishers and captive reporters) to wrest control of their destiny from the masses. White recounts Roosevelt's initial victory over the press corps, and the effect his wily manipulations had on press coverage of his administrations and on his own public image. He believes Roosevelt's denunciation of the press was less an accurate description of the press's behavior towards his administrations than a product of his own preconceptions about the nature of the Presidency. White concludes that

Roosevelt's plan was to disarm those he saw as the foes of democracy by accusing them of unfairly maligning him.

The Clay-worker Dec 30 2019 "The log of the clay worker": v. 100, p. 188-193.

Enemy of the People Nov 28 2019 Shortly after assuming office in January 2017, President Donald Trump accused the press of being an "enemy of the American people." Attacks on the media had been a hallmark of Trump's presidential campaign, but this charge marked a dramatic turning point: language like this ventured into dangerous territory. Twentieth-century dictators—notably, Stalin, Hitler, and Mao—had all denounced their critics, especially the press, as "enemies of the people." Their goal was to delegitimize the work of the press as "fake news" and create confusion in the public mind about what's real and what isn't; what can be trusted and what can't be. That, it seems, is

also Trump's goal. In *Enemy of the People*, Marvin Kalb, an award-winning American journalist with more than six decades of experience both as a journalist and media observer, writes with passion about why we should fear for the future of American democracy because of the unrelenting attacks by the Trump administration on the press. As his new book shows, the press has been a bulwark in the defense of democracy. Kalb writes about Edward R. Murrow's courageous reporting on Senator Joseph McCarthy's "red scare" theatrics in the early 1950s, which led to McCarthy's demise. He reminds us of Bob Woodward and Carl Bernstein's reporting in the early 1970s that led to President Richard Nixon's resignation. Today, because of revolutionary changes in journalism, no Murrow is ready at the battlements. Journalism has been severely weakened. Yet, without a virile, strong press, democracy is in peril. Kalb's book is a frightening indictment of President Trump's

efforts to delegitimize the American press—and put the future of our democracy in question.

Citizen Science Dec 10 2020 Citizen science, the active participation of the public in scientific research projects, is a rapidly expanding field in open science and open innovation. It provides an integrated model of public knowledge production and engagement with science. As a growing worldwide phenomenon, it is invigorated by evolving new technologies that connect people easily and effectively with the scientific community. Catalysed by citizens' wishes to be actively involved in scientific processes, as a result of recent societal trends, it also offers contributions to the rise in tertiary

education. In addition, citizen science provides a valuable tool for citizens to play a more active role in sustainable development. This book identifies and explains the role of citizen science within innovation in science and society, and as a vibrant and productive science-policy interface. The scope of this volume is global, geared towards identifying solutions and lessons to be applied across science, practice and policy. The chapters consider the role of citizen science in the context of the wider agenda of open science and open innovation, and discuss progress towards responsible research and innovation, two of the most critical aspects of science today.
